

Wyoming State Treasurer's Office

Investment Performance Analysis

Period Ended: December 31, 2014

WYOMING STATE TREASURER'S OFFICE

FOURTH QUARTER 2014

| |
|--------------------------|
| TABLE OF CONTENTS |
|--------------------------|

QUARTERLY COMMENTARY

- This two-page memo provides a written summary of significant observations regarding performance of the State's Funds, and provides an overview of performance during the quarter for each of the asset classes the State is invested in.

MARKET ENVIRONMENT PAGE 1-8

- This section is intended to review capital markets in general (i.e. not specific to Wyoming), and includes a written summary of events during the quarter, including economic influences and review of equity and bond markets as a whole. This section also includes various charts and exhibits displaying key characteristics of major market indices representing the broad range of available asset classes, including alternative investments such as absolute return and real estate. Lastly, this section includes a review of the benchmarks referenced within the quarterly report.

PERFORMANCE SUMMARY PAGE 9-15

- These 7 pages provide all the market value, asset allocation, and performance information for the State's investments, in summary form.

INVESTMENT POLICY OBJECTIVE REVIEW PAGE 16-34

- This section provides a compliance check for the Total Fund, and for each individual manager portfolio, versus the guidelines and expectations outlined in the State's Master Investment Policy and Sub-Policies.

APPENDIX..... PAGE 35-41

- The appendix includes a glossary, giving definitions and other information on data included throughout the report, including financial terms and ratios, indices, peers groups. The addendum page in the appendix includes important comments specific to Wyoming regarding market value, performance, and allocation information provided throughout the report.

Memorandum

| Date | December 31, 2014 |

Outlined below please find a summary of significant observations regarding performance of the State's Funds for the period ended December 31, 2014. We hope this summary will facilitate your review of our Investment Performance Analysis Report.

The Total Fund returned 1.3% during the fourth quarter as heightened volatility caused market performance to become increasingly bifurcated between domestic and international markets. Longer-term performance for the Total Fund remains strong, with the State earning returns of 4.9% and 5.5% per annum over the trailing seven- and ten-year periods.

The Total Fund trailed its custom benchmark over the quarter as the market was impacted by macroeconomic policy and rapidly falling oil prices. The fourth quarter capped off what has been a challenging year and return environment for most active managers relative to broad market indices. However, the State continues to outperform its custom benchmark over longer-term trailing periods. The State has lower strategic exposure to equities relative to the All Master Trust Universe and subsequently underperformed the peer group in the fourth quarter as US equity markets continued to rally. Relative to the Universe, the State continues to generate more return for each unit of risk exposure, with risk-adjusted returns ranking in the top 20% and 10% of all Plans over the trailing five- and ten-year time periods, respectively.

The State's investment pools produced positive returns during the fourth quarter with mixed results relative to their respective custom benchmarks. The State's permanent funds with larger strategic allocations to equities generated higher absolute and relative returns than the State's non-permanent funds with larger strategic allocations to fixed income.

Domestic fixed income markets performed modestly well during the quarter despite the Federal Reserve putting an end to quantitative easing. Although yields have fallen throughout most of the year, interest rates in the US are still among the highest in the developed world and remain attractive to global investors on a relative basis. The State's fixed income portfolio trailed the Barclays US Aggregate Bond Index during the quarter, returning 1.0% versus 1.8% for the index. The State's Core fixed income portfolio kept pace

with the broad market index, while Emerging Markets Debt (Local Currency Denominated) and Credit earned negative returns and trailed their respective benchmarks. Emerging Markets Debt detracted from the State's fixed income performance amidst a rising US dollar and concerns regarding the ramifications of falling oil prices on emerging economies.

The economic recovery in the US continues to gain momentum as a steady increase in job creation helped round out the strongest year of job gains since 1999 while the unemployment rate ended the year at 5.6%. An upward revision of the previous GDP reading also benefited several segments of the US equity market. The S&P 500 Index rallied significantly during the fourth quarter, returning 4.9% during the fourth quarter. During the quarter, the State began the transition to the new core-satellite US equity asset class structure, funding State Street to manage a passively managed, low volatility all cap mandate, Epoch and Lazard to fulfill the new active all cap mandate, and RBC to manage small cap equity. Additional assets are intended to transition to a global equity manager during the first quarter of 2015. The State's US Equity portfolio earned 13.8% over the trailing one-year period, tracking the performance of its custom benchmark.

International equity markets struggled during the fourth quarter amidst continued deflationary concerns in the Eurozone and renewed concerns over emerging economies following an extreme decline in oil prices. In an effort to spur growth and make lending more attractive, the ECB announced quantitative easing plans involving the purchase of investment grade securities. Developed markets outperformed emerging markets on a relative basis, with the MSCI EAFE Index returning -3.6% versus -4.5% earned by the MSCI Emerging Markets Index. The State's International Equity portfolio returned -3.0% during the quarter, outperforming its custom index by 0.9%. Among the State's active international equity managers, Fisher Investments outperformed the MSCI ACW Ex US Index by 4.2% as the portfolio contained limited exposure to energy stocks. Manning & Napier trailed the broad market index by 0.3% during the fourth quarter and The Boston Company trailed the MSCI ACW Ex US Value Index by 0.9%.

Core real estate and absolute return assets delivered positive absolute and mixed relative performance during the quarter. Core real estate returned 3.8%, with both income and capital appreciation contributing to returns. The State's two core real estate managers, Clarion and UBS, returned 4.3% and 3.0% respectively versus 3.3% for the NCREIF ODCE Index. Higher degrees of leverage benefitted in the low interest rate, risk-on environment. Absolute return strategies that capitalized on the upward trends in the US dollar and the downward momentum in oil and developed market interest rates were the best performers in fourth quarter. The State's absolute return portfolio returned 0.6% during the quarter, with Aurora L.P. and Aurora L.P. II outperforming the 0.7% earned by the HFN FOF Multi-Strat Index. PAAMCO trailed the HFN FOF Multi-Strat Index by 0.7% during the quarter as energy exposure and an unexpected pharmaceutical deal break detracted from performance.

Fourth Quarter Economic Environment

Key Economic Indicators

Multiple periods of heightened volatility hit global markets in Q4. However, a strengthening of the U.S. dollar combined with rapidly falling oil prices caused domestic markets to decouple from international markets. The U.S. economy continues to show strength compared to foreign regions. Non-farm payroll jobs increased at an average monthly rate of 289,000 rounding out the strongest year of job gains since 1999. Furthermore, the unemployment rate continued to decline, ending the year at 5.6%. While market participants continue to forecast interest rate hikes by mid-2015, further signs of disinflation could push the date out further. Economic developments in Europe and emerging economies were less impressive. European monetary policy has proven successful in recapitalizing the banking system; however, lending remains constrained due to weak loan demand from the private sector. Within emerging economies, falling oil prices and a rising U.S. dollar have led to renewed concerns over possible balance of payments issues and capital flight.

Fourth Quarter Review

Broad Market

The U.S. equity market rallied significantly in October and November, supported by a revised Q3 GDP growth estimate of 5%.

Market Cap

As the risk appetite of investors increased during the quarter, small-cap stocks outpaced the mid- and large-cap segments with a spread of nearly 500 basis points between the Russell 2000 and Russell 1000. This represented a trend reversal, as small-cap underperformed large-cap earlier in 2014.

Style

Value stocks finished the year on a positive note with the spread between the Russell 3000 Value and Russell 3000 Growth increasing by 26 basis points for the year.

Sector

Due to a spike in volatility and anticipation of interest rate declines, high dividend stocks outperformed lower yielding stocks, with the strongest results in the Utilities sector. Energy stocks lagged the general market significantly for the quarter.

Style and Capitalization Market Performance (%)

Valuations

S&P 500 Index Sector Performance (%)

Valuation data courtesy of Bloomberg Professional Service and Robert J. Shiller, Irrational Exuberance, Second Edition. P/E metrics shown represent the 5th through 95th percentiles to minimize the effect of outliers.

Fourth Quarter Review

Broad Market

Poor performance plagued developed international markets across the board, while emerging economies were hurt by deflationary headwinds from an oversupply of oil and weaker than expected demand in developed countries.

Market Cap & Style

Small-cap outperformed for the quarter but was in line with large-cap for the full year. Growth stocks significantly outperformed value for the quarter and finished ahead of value stocks over the calendar year.

Developed Markets

One of the only bright spots in the developed world was Hong Kong. In September, China announced reforms to the Hong Kong electoral system which spurred protests. Upon the dissolution of the protests in December, the market moved into positive territory.

Emerging Markets

Emerging and frontier markets returned less than their developed counterparts. Russia, which was impacted by collapsing oil prices and increased Ukraine-related economic sanctions, was the worst performer.

MSCI Style and Capitalization Market Performance (%)

Valuations

MSCI Region Performance (%)

Valuation data courtesy of Bloomberg Professional Service. P/E metrics shown represent the 5th through 95th percentiles to minimize the effect of outliers. All returns are shown net of foreign taxes on dividends.

Fourth Quarter Review

Broad Market

U.S. fixed income performed modestly well as the treasury yield curve flattened over the quarter. The Barclays U.S. Aggregate Index returned 1.8% for the quarter, ending 2014 with a return above its 5- and 10-year averages. 2014 was the second least volatile year since the inception of the Barclays U.S. Aggregate Index.

US Treasury Market

Long duration treasuries outperformed intermediate duration by 765 basis points as the market favored duration and quality.

Foreign Currency

As the U.S. dollar strengthened, exposure to foreign currency impacted returns. The hedged Barclays Global Aggregate Bond Index outperformed the unhedged version by 324 basis points in Q4 and 700 basis points for the year. Excluding currency effects, the government bonds of other developed countries performed similarly to U.S. Treasuries. However, emerging markets debt (EMD) underperformed due to the recent market bias toward quality. Local currency EMD has suffered doubly due to foreign currency exposure.

Valuations shown represent the 5th through 95th percentiles to minimize the effect of outliers.

Fourth Quarter Review - Absolute Return

General Market - Hedge Funds

Funds with concentration in event-oriented themes suffered due to two developments in Q4. As such, hedge funds experienced larger than expected losses during the volatile, early half of October, and failed to rebound by quarter end. Generally, long/short equity funds maintained or added to long exposures during the October bottom, which helped these funds earn positive returns in November and December.

General Market - Global Tactical Asset Allocation (GTAA)

In the fourth quarter, GTAA managers with fewer benchmark constraints underperformed more-traditional asset allocations such as a static 60/40 portfolio. In all, 2014 was a difficult year for GTAA managers, as exposure to foreign developed and emerging market equities weighed on performance. Managers with valuation driven asset allocation processes continued to find attractive valuations in emerging and developed foreign equity markets relative to U.S. equities. However, strategies that maintain heavier U.S. equity and fixed income exposure have continued to outperform globally-oriented peers.

Fourth Quarter Review - Real Assets

General Market - Diversified Inflation Strategies (DIS)

Few bright spots existed for diversified inflation strategies (DIS) in Q4 as inflation expectations continued to fall. The historic decrease in oil prices and commodities detracted significantly from the returns of many managers. The Goldman Sachs Commodities Index finished the year down 33.1%, losing 27.7% in the fourth quarter. Natural Resources equities depreciated over 10% after a second straight negative quarter.

General Market - Real Estate

Performance in the U.S. Core Real Estate market capped off a strong year, as evidenced by a 3.3% preliminary total return in Q4 for the NCREIF-ODCE index, resulting in a 12.5% return for the year. Additionally, publicly-traded real estate securities bounced back in Q4. The U.S. commercial real estate market showed continued improvement with drops in vacancy rates occurring in the office, industrial, and retail sectors. Private real estate investment reached an all-time high in 2014 with \$742 billion in assets under management.

INDEX GLOSSARY

MSCI World: The **MSCI World Index** is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The index consists of the following developed market countries: *Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, and the United States.*

US Equity Custom Index: The **US Equity Custom Index** consists of the S&P 500 Index (Cap Wtd) through September 2014 and the Russell 3000 Index thereafter.

S&P 500: The **S&P 500 Index (Cap Wtd)** is a commonly recognized, market-capitalization weighted index of 500 widely held equity securities designed to measure broad US equity performance.

R 3000: The **Russell 3000 Index** is a market-capitalization weighted index of 3,000 widely held equity securities designed to measure performance of the entire U.S. stock market.

State Street All Cap Custom Index: The **State Street All Cap Custom Index** consists of 69% Russell 3000 Index, 24% FTSE RAFI US 1000 Index, and 7% MSCI USA Minimum Volatility Index.

R 2000: The **Russell 2000 Index** measures the performance of the small-cap segment of the US equity market. It includes approximately 2,000 of the smallest securities by market cap from the Russell 3000 Index.

International Equity Custom Index: The **International Equity Custom Index** consists of the MSCI EAFE Index through July 2010 and the MSCI ACW Ex US Index thereafter.

MSCI ACW Ex US: The **MSCI ACW (All Country World) Ex US Index** is designed to measure equity market performance in global developed and emerging markets, excluding the US. The 22 underlying developed countries are: *Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the United Kingdom.* The 23 emerging market countries are: *Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Peru, Philippines, Poland, Russia, Qatar, South Africa, Taiwan, Thailand, Turkey, and United Arab Emirates.*

MSCI ACW Ex US Value: The **MSCI ACW (All Country World) Ex US Value Index** is identical to the MSCI ACW Ex US with the exception that it focuses specifically on the value segment of global developed and emerging markets.

MSCI EAFE: The **MSCI EAFE (Europe, Australasia, Far East) Index** is designed to measure equity market performance of 21 developed countries, excluding the US & Canada: *Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the United Kingdom.*

Fisher Custom Index: The **Fisher Custom Index** consists of the MSCI EAFE Index through July 2010 and the MSCI ACW Ex US Index thereafter.

Barclays US Trsy: US TIPS: The **Barclays US Treasury: US TIPS Index** is an unmanaged index that consists of inflation-protected securities issued by the U.S. Treasury.

Barclays US Agg Bond: The **Barclays US Aggregate Bond Index** covers the US dollar-denominated, investment-grade, fixed-rate, taxable bond market of SEC-registered securities: US Treasury and agency bonds, domestic corporate debt, and mortgage-backed securities.

Credit Custom Index: The **Credit Custom Index** consists of 20% Barclays US Credit Index, 20% BofA Merrill Lynch US High Yield Master II Constrained Index, and 60% S&P/LSTA Leveraged Loan Index.

JPMorgan GBI-EM Gbl Dvf'd: The **JPMorgan GBI-EM Global Diversified Total Return Index (Unhedged)** is a global emerging markets index that consist or regularly traded, liquid fixed-rate, domestic currency government bonds.

CS Western European Hi Yld: The **Credit Suisse Western European High Yield Index** is designed to mirror the investable universe of the Western European high yield debt market. The index includes issues denominated in \$US and Western European currencies.

Barclays US Govt: Int Trm Bond: The **Barclays US Gov't Intermediate Term Bond Index** covers public US government obligations with remaining maturities of between three and five years.

BofA ML All Convertibles: The **BofA Merrill Lynch All Convertibles Index (All Qualities)** is a market capitalization-weighted index of domestic corporate convertible securities that are convertible to common stock.

BofA ML 3 Mo US T-Bill: The **BofA Merrill Lynch 3-Month US T-Bill Index** consists of newly issued 90-day Treasury bills.

JP Morgan Blended Index: The **JP Morgan Blended Index** consists of an equal-weighted allocation to the BofA ML 1-3 Year US Treasury Index, BofA ML 1-3 Year Agencies Index, and BofA ML 0-3 Year Weighted Average Life Mortgage Index.

NCREIF ODCE: The **NCREIF ODCE (Open End Diversified Core) Index** is an index of investment returns reporting on both a historical and current basis the results of 16 open-end commingled funds pursuing a core investment strategy, some of which have performance histories dating back to the 1970s. The NCREIF ODCE Index is capitalization-weighted and performance is time-weighted.

NCREIF Property: The **NCREIF Property Index** prepared by the National Council of Real Estate Investment Fiduciaries is a quarterly time series composite return measure for over 6,000 individual commercial real estate properties acquired in the private market for investment purposes. Total performance represents returns from appreciation and income, and includes multi-family, office, retail, and industrial properties.

HFN FOF Multi Strat: The **HFN FOF (Fund of Funds) Multi-Strategy Index** average is created by HedgeFund.net and contains over 1,600 funds of hedge funds that are each invested in multiple investment strategies.

Global Recovery Custom Index: The **Global Recovery Custom Index** consists of 50% Credit Suisse Distressed Loan Index, 20% Credit Suisse High Yield Index, and 30% ABX Index.

Wyoming State Treasurer's Office

Investment Performance

December 31, 2014

Investment Policy:

It is the investment policy for the State Loan and Investment Board to invest public funds of the State of Wyoming in a manner that strives for maximum safety, provides adequate liquidity to meet all operating requirements, and achieves the highest possible investment return consistent with the primary objectives of safety and liquidity.

Investment Objectives and Priorities:

All available funds shall be invested with the following objectives and priorities:

- a) Safety of principal. Investments shall be undertaken in a manner that seeks to ensure the preservation of capital in the overall portfolio.
- b) Liquidity requirements of anticipated and unanticipated expenditures.
- c) Yield.
- d) Recognition of differing objectives and needs of various fund portfolios.
- e) Conformance with State law and other pertinent legal restrictions.
- f) Maximization of the total rate of return on investment consistent with the foregoing objectives.
- g) Diversification by asset type, security, and investment manager in order to smooth the volatility of quarterly returns.

Current Asset Allocation:

Historical 7-Year Asset Allocation:

Historical Performance:

| | Total Investment Value | Fiscal Year Ending 06/30/14 Market Value | Current Market Value | % of MV | QTD Return | FYTD Return | 1 Year Return | 3 Year Return | 5 Year Return | 10 Year Return |

Note[1]: Performance shown is gross of fees with the exception of convertible bonds and absolute return, which are shown net of fees.
 Note[2]: Pooled investment performance and market values shown reflect State Agency participation and are calculated on a capital-weighted basis using beginning-period allocations.
 Note[3]: Thematic allocations shown exclude Wyoming Investments.
 Note[4]: The Wyoming State Actual Allocation Index is calculated using beginning-month asset class weights applied to the appropriate asset class benchmark return.
 Note[5]: Market Value and Total Investment Value are shown in (\$) Millions.

* Denotes Non-Permanent Fund.

Note[1]: Performance shown is gross of fees with the exception of convertible bonds and absolute return, which are shown net of fees. Investment performance is calculated on invested assets only.

Note[2]: Pooled investment performance and market values shown reflect State Agency participation and are calculated on a capital-weighted basis using beginning-period allocations.

Note[3]: US Equity Custom Index consists of S&P 500 (Cap Wtd) through September 2014 and the Russell 3000 thereafter.

Note[4]: International Equity Custom Index consists of MSCI EAFE (Gross) through July 2010 and the MSCI ACW Ex US (Net) thereafter.

Note[5]: Market values for non-core real estate and private equity are as of the most recent valuation, adjusted for subsequent cash flows. Investment (Cost) Values are not lagged.

Note[6]: Performance for Private Equity and Value-Added Real Estate investments is calculated on an IRR basis. For further analysis, please refer to the supplementary alternatives performance report.

Note[7]: Cash Equivalents performance includes Extended Cash performance.

Note[8]: Market values shown for Wyoming Investments reflect cost value of the investments.

Note[1]: Performance shown is gross of fees with the exception of convertible bonds and absolute return, which are shown net of fees.

Note[2]: Returns are stated in traditional total return terms and do not specify realized income.

Note[3]: Market values for non-core real estate and private equity are as of the most recent valuation, adjusted for subsequent cash flows. Investment (Cost) Values are not lagged.

Note[4]: Performance for Private Equity and Value-Added Real Estate investments is calculated on an IRR basis. For further analysis, please refer to the supplementary alternatives report.

Note[5]: Market values for M&G are converted from British Pounds using the noon New York City Federal exchange rate. Cost values are converted using the 5pm London WM Benchmark rate.

Note[6]: The Global Recovery Custom Index consists of 50% Credit Suisse Distressed Loan Index, 20% Credit Suisse High Yield Index, and 30% ABX Index.

Note[7]: Market values shown for Wyoming Investments reflect cost value of the investments.

| Investment Policy Guidelines | Meeting Objective | | | Explanation |
|---|-------------------|----|-----|--|
| | Yes | No | N/A | Explanation |
| 1. Total Fund | | | | |
| Exceed the rate of inflation (C.P.I.) over a market cycle of 5-years. | ✓ | | | Wyoming returned 6.4% vs. 1.7% for the C.P.I. for the current 5-year period |
| Exceed a weighted index of the total fund's asset allocation and component benchmarks over rolling 5-year periods by an appropriate amount. | ✓ | | | Wyoming returned 6.4% vs. 6.0% for the Actual Allocation Index for the current 5-year period |
| Not more than 1% of the outstanding common shares of any corporation shall be owned by the State. An exception may be made for Alternative Investments. | ✓ | | | |
| Not more than 1.5% of the total book value of permanent funds shall be invested in the common stock of any corporation. An exception may be made for Alternative Investments. | ✓ | | | |

| | Yes | No | N/A | Explanation |
|--|-----|----|-----|--|
| 2. Investment Funds | | | | |
| a) Permanent Mineral Trust Fund | | | | |
| Exceed a weighted index of the Fund's asset allocation and component benchmarks over a full market cycle, approximated by the most recent 5-year period. | ✓ | | | 5-year: Permanent Mineral Trust Fund return was 7.8% vs. 7.2% for the Actual Allocation Index |
| b) Permanent Land Fund | | | | |
| Exceed a weighted index of the Fund's asset allocation and component benchmarks over a full market cycle, approximated by the most recent 5-year period. | ✓ | | | 5-year: Permanent Land Fund return was 7.7% vs. 7.1% for the Actual Allocation Index |
| c) University Permanent Land Fund | | | | |
| Exceed a weighted index of the Fund's asset allocation and component benchmarks over a full market cycle, approximated by the most recent 5-year period. | ✓ | | | 5-year: University Permanent Land Fund return was 7.7% vs. 7.2% for the Actual Allocation Index |
| d) Common School Permanent Land Fund | | | | |
| Exceed a weighted index of the Fund's asset allocation and component benchmarks over a full market cycle, approximated by the most recent 5-year period. | ✓ | | | 5-year: Common School Permanent Land Fund return was 8.0% vs. 7.3% for the Actual Allocation Index |
| e) Hathaway Scholarship Endowment Fund | | | | |
| Exceed a weighted index of the Fund's asset allocation and component benchmarks over a full market cycle, approximated by the most recent 5-year period. | ✓ | | | 5-year: Hathaway Scholarship Endowment Fund return was 7.2% vs. 6.7% for the Actual Allocation Index |
| f) Higher Education Endowment Fund | | | | |
| Exceed a weighted index of the Fund's asset allocation and component benchmarks over a full market cycle, approximated by the most recent 5-year period. | ✓ | | | 5-year: Higher Education Endowment Fund return was 7.2% vs. 6.6% for the Actual Allocation Index |
| g) Workers Compensation Fund | | | | |
| Exceed a weighted index of the Fund's asset allocation and component benchmarks over a full market cycle, approximated by the most recent 5-year period. | ✓ | | | 5-year: Workers Compensation Fund return was 6.3% vs. 5.8% for the Actual Allocation Index |
| h) Tobacco Settlement Trust Fund | | | | |
| At least 5% to 10% of the fund balance should be invested in securities with maturities of less than one year. | ✓ | | | |
| No public and/or private equities are permitted. | ✓ | | | |
| Exceed a weighted index of the Fund's asset allocation and component benchmarks over a full market cycle, approximated by the most recent 5-year period. | ✓ | | | 5-year: Tobacco Settlement Trust Fund return was 4.8% vs. 4.5% for the Actual Allocation Index |
| i) State Agency Pool | | | | |
| At least 10% to 15% of the fund balance should be invested in securities with maturities of less than one year. | ✓ | | | |
| No public and/or private equities are permitted. | ✓ | | | |
| Exceed a weighted index of the Fund's asset allocation and component benchmarks over a full market cycle, approximated by the most recent 5-year period. | ✓ | | | 5-year: State Agency Pool return was 3.9% vs. 3.7% for the Actual Allocation Index |

| | Yes | No | N/A | Explanation |
|---|-----|----|-----|-----------------------------------|
| 3. US Equity Portfolios | | | | |
| c) State Street Global Advisors - All Cap | | | | |
| A maximum of the greater of five percent (5%), or the benchmark weighting plus two percent (2%), of the total stock portfolio of a manager may be invested in any one security. | ✓ | | | Largest Holding: Apple Inc = 2.4% |
| A maximum of one percent (1%) of the outstanding float of shares of one company may be held in companies with market capitalizations of \$5 Billion or greater at the time of purchase. A maximum of five percent (5%) of the outstanding float of shares of one company may be held in companies with market capitalizations of less than \$5 Billion at the time of purchase. | ✓ | | | |
| The maximum allowable in any sector, as defined as Global Industry Classification System Level 1, is two and one-half (2.5) times the respective benchmark weighting, unless the contract with the investment manager specifically provides otherwise. | ✓ | | | |
| A minimum number of twenty (20) securities shall be held. | ✓ | | | |

| Obligations of specific issuers are subject to five percent (5%) per issuer limit, excluding investments in commingled vehicles. | ✓ | | | |
| Standalone purchases of private placements, including 144A securities, are not allowed. | ✓ | | | The portfolio contains a single investment in a private fund that The State of Wyoming is eligible to purchase. This private fund is a QIB and is permitted to purchase 144A securities. |
| Outperform the State's custom benchmark as measured by twenty percent (20%) Barclays US Credit Index, twenty percent (20%) BofA Merrill Lynch US High Yield Master II Constrained Index and sixty percent (60%) S&P/LSTA Leveraged Loan Index by 50 basis points, net of fees, over a full market cycle, approximated by the most recent 5-year period. | | | N/A | Inception date: 05/2013 |
| Performance should rank in the top 40th percentile of peer manager universe as measured by the State's Consultant, gross of fees, over a full market cycle, approximated by the most recent five-year period. | | | N/A | Inception date: 05/2013 |
| Investment Grade Credit Sleeve: | | | | |
| Minimum Issue Credit Rating at the time of purchase will be: BBB- for individual securities. Standard and Poor's, Fitch, or Moody's ratings are acceptable. If the issue is rated by all three rating agencies, the middle rating will apply. If the security is rated by two rating agencies, the lower rating will apply. | ✓ | | | |
| Minimum of ten percent (10%) of the total portfolio must be invested in investment grade rated securities and a maximum of sixty percent (60%) of the total portfolio can be invested in investment grade rated securities. | ✓ | | | |
| High Yield Sleeve: | | | | |
| Minimum Issue Credit Rating at the time of purchase will be: CCC- for individual securities. Standard and Poor's, Fitch, or Moody's ratings are acceptable. If the issue is rated by all three rating agencies, the middle rating will apply. If the security is rated by two rating agencies, the lower rating will apply. | ✓ | | | |
| Maximum of forty percent (40%) of the total portfolio can be invested in high yield bonds. | ✓ | | | |
| Bank Loan Sleeve: | | | | |
| Minimum Issue Credit Rating at the time of purchase will be: CCC for individual securities. Standard and Poor's, Fitch, or Moody's ratings are acceptable. If the issue is rated by all three rating agencies, the middle rating will apply. If the security is rated by two rating agencies, the lower rating will apply. | ✓ | | | |
| Minimum of forty percent (40%) of the total portfolio must be invested in bank loans and a maximum of eighty percent (80%) of the total portfolio can be invested in bank loans. | ✓ | | | |

| | Yes | No | N/A | Explanation |
|--|-----|----|-----|---|
| j) Investec – Emerging Market Debt (Local Currency) | | | | |
| Duration must fall in the range of plus or minus twenty percent (20%) of the index. | ✓ | | | |
| Minimum Issue Credit Rating at the time of purchase will be: A1 for commercial paper B- for individual securities Standard and Poor's, Fitch, or Moody's ratings are acceptable. If the issue is rated by all three rating agencies, the middle rating will apply. If the security is rated by two rating agencies, the lower rating will apply. Where a security is not rated at the issue level, the issuer rating will be relied upon. | ✓ | | | |
| Average portfolio credit quality must be BB+ or better. | ✓ | | | |
| Obligations of individual sovereign/quasi-sovereign issuer are subject to a twenty-five percent (25%) per issuer limit. | ✓ | | | |
| Private placements, including 144A securities are not allowed. | ✓ | | | There are four 144A securities held by this portfolio. Retention of this security in the portfolio is permitted pursuant to Section 7.2 of the Investment Policy. |
| The investment manager, as part of managing the account, can take net investment positions of up to twenty percent (20%) of the portfolio in currency and currency forwards. | ✓ | | | |
| Outperform the JP Morgan GBI-EM Global Diversified Unhedged Index by 50 basis points, net of fees, over a full market cycle, approximated by the most recent 5-year period. | | | N/A | Inception date: 04/2013 |
| Performance should rank in the top 40th percentile of peer manager universe as measured by the State's Consultant, gross of fees, over a full market cycle, approximated by the most recent five-year period. | | | N/A | Inception date: 04/2013 |

| | Yes | No | N/A | Explanation |
|--|-----|----|-----|--|
| k) Stone Harbor – Emerging Market Debt (Local Currency) | | | | |
| Duration must fall in the range of plus or minus twenty percent (20%) of the index. | ✓ | | | |
| Minimum Issue Credit Rating at the time of purchase will be: A1 for commercial paper B- for individual securities Standard and Poor's, Fitch, or Moody's ratings are acceptable. If the issue is rated by all three rating agencies, the middle rating will apply. If the security is rated by two rating agencies, the lower rating will apply. Where a security is not rated at the issue level, the issuer rating will be relied upon. | ✓ | | | Four securities were downgraded to CCC during Q4 2014. Please note that the fund does not have minimum credit quality requirements and these securities do not violate any of the investment guidelines as specified in the prospectus. |
| Average portfolio credit quality must be BB+ or better. | ✓ | | | |
| Obligations of individual sovereign/quasi-sovereign issuer are subject to a twenty-five percent (25%) per issuer limit. | ✓ | | | |
| Private placements, including 144A securities are not allowed. | ✓ | | | The portfolio holds private placement and 144A securities. Retention of these securities in the portfolio is permitted pursuant to Section 7.2 of the Investment Policy. |
| The investment manager, as part of managing the account, can take net investment positions of up to twenty percent (20%) of the portfolio in currency and currency forwards. | ✓ | | | |
| Outperform the JP Morgan GBI-EM Global Diversified Unhedged Index by 50 basis points, net of fees, over a full market cycle, approximated by the most recent 5-year period. | | | N/A | Inception date: 04/2013 |
| Performance should rank in the top 40th percentile of peer manager universe as measured by the State's Consultant, gross of fees, over a full market cycle, approximated by the most recent five-year period. | | | N/A | Inception date: 04/2013 |
| l) Grosvenor Silvery Lupine Fund - Opportunistic Fixed Income | | | | |
| Outperform the CS Western European Hi Yld Index, net of fees, over a full market cycle, approximated by the most recent 5-year period. | | | N/A | Inception date: 07/2014 |
| 6. Convertible Bond Portfolios | | | | |
| a) Allianz Global Investors | | | | |
| Outperform the BofA ML All Quality Convertible Bond Index by 100 basis points, net of fees, over a full market cycle, approximated by the most recent 5-year period. | | ✗ | | 5-year: Allianz Global Investors net of fees return was 12.3% vs. 11.7% for the BofA ML All Quality Convertible Bond Index |

| | Yes | No | N/A | Explanation |
|--|-----|----|-----|---|
| 7. Cash and Cash Equivalents Portfolios | | | | |
| JP Morgan Cash Composite* | | | | |
| a) JP Morgan Treasury Cash | | | | |
| Portfolio's weighted average maturity is not to exceed 90 days. | ✓ | | | |
| Portfolio's maximum average cash flow weighted duration of the portfolio must not exceed 90 days. | ✓ | | | |
| The market value of the portfolio must remain within plus or minus one-half percent (0.5%) of one percent (1%) of amortized cost. | ✓ | | | |
| A maximum of 10% of total assets shall be placed in the securities of one issuer except for government securities. | ✓ | | | |
| Investment in any single issuer must not exceed 5% of the outstanding issues of that issuer. | ✓ | | | |
| Investment performance must exceed Monitored Repurchase Agreement Rate plus 15 basis points and the cash equivalents allocation by the 90-day T-Bill rate, net of fees, over a full market cycle, approximated by the most recent 5-year period. | | ✗ | | 5-year: JP Morgan Treasury Cash net of fees return was 0.0% vs. 0.1% for the BofA ML 3 Mo US T-Bill Index |
| b) JP Morgan Treasury Extended Cash | | | | |
| Portfolio's average cash flow weighted duration is not to exceed 3 years. | ✓ | | | |
| Average cash flow weighted duration is not to exceed 3 years. | ✓ | | | |
| Individual securities must not exceed cash flow weighted duration of greater than 5-years. | | ✗ | | One security has cash flow weighted duration extended past 5 years. The State has been made aware of this security. |
| A maximum of 10% of total assets shall be placed in the securities of one issuer except for government securities. | ✓ | | | |
| Investment Performance must exceed an Equal Weighted Blend of the BofA Merrill Lynch 1-3 Year Agency, 1-3 Year Treasury, and a 0-3 Year Mortgage Index, net of fees, over a full market cycle, approximated by the most recent 5-year period. | | ✗ | | 5-year: JP Morgan Treasury Extended Cash net of fees return was 1.5% vs. 1.6% for the Blended Index |
| The extended portfolio must not exceed 35% of the total JP Morgan managed portfolio. | ✓ | | | |

*During the fourth quarter of 2011, JP Morgan Treasury Cash and JP Morgan Treasury Extended Cash were combined. Net of fees performance shown consists of performance calculated by RVK, Inc. prior to December 31, 2011 and performance calculated by JP Morgan thereafter.

| | Yes | No | N/A | Explanation |

| Core Real Estate | | | | |
| a) Clarion Lion | | | | |
| Outperform the NCREIF Fund Index – Open-End Diversified Core Equity (ODCE) by 75 basis points, net of fees, over a full market cycle, approximated by the most recent 5-year period. | ✓ | | | 5-year: Clarion Lion net of fees return was 14.0% vs. 12.9% for the NCREIF ODCE Index (Net) (AWA) |
| b) UBS Trumbull | | | | |
| Outperform the NCREIF Fund Index – Open-End Diversified Core Equity (ODCE) by 75 basis points, net of fees, over a full market cycle, approximated by the most recent 5-year period. | | ✗ | | 5-year: UBS Trumbull net of fees return was 11.3% vs. 12.9% for the NCREIF ODCE Index (Net) (AWA) |

| | Yes | No | N/A | Explanation |
|---|-----|----|-----|---|
| Absolute Return | | | | |
| c) PAAMCO | | | | |
| Outperform the 90-Day T-Bills by 500 basis points, net of all fees (including underlying fund manager fees), over a full market cycle, approximated by the most recent 5-year period. | ✓ | | | 5-year: PAAMCO net of fees return was 5.4% vs. 0.1% for the BofA ML 3 Mo US T-Bill Index |
| Outperform the HFN Fund of Funds Multi-Strategy Index, net of all fees (including underlying fund manager fees), over a full market cycle, approximated by the most recent 5-year period. | ✓ | | | 5-year: PAAMCO net of fees return was 5.4% vs. 3.1% for the HFN FOF Multi-Strategy Index |
| d) Aurora L.P. | | | | |
| Outperform the 90-Day T-Bills by 500 basis points, net of all fees (including underlying fund manager fees), over a full market cycle, approximated by the most recent 5-year period. | | ✗ | | 5-year: Aurora L.P. net of fees return was 4.4% vs. 0.1% for the BofA ML 3 Mo US T-Bill Index |
| Outperform the HFN Fund of Funds Multi-Strategy Index, net of all fees (including underlying fund manager fees), over a full market cycle, approximated by the most recent 5-year period. | ✓ | | | 5-year: Aurora L.P. net of fees return was 4.4% vs. 3.1% for the HFN FOF Multi-Strategy Index |
| e) Aurora L.P. II | | | | |
| Outperform the 90-Day T-Bills by 500 basis points, net of all fees (including underlying fund manager fees), over a full market cycle, approximated by the most recent 5-year period. | | ✗ | | 5-year: Aurora L.P. II net of fees return was 4.1% vs. 0.1% for the BofA ML 3 Mo US T-Bill Index |
| Outperform the HFN Fund of Funds Multi-Strategy Index, net of all fees (including underlying fund manager fees), over a full market cycle, approximated by the most recent 5-year period. | ✓ | | | 5-year: Aurora L.P. II net of fees return was 4.1% vs. 3.1% for the HFN FOF Multi-Strategy Index |
| f) Grosvenor Global Recovery Fund | | | | |
| Outperform the Global Recovery Custom Index, net of all fees (including underlying fund manager fees), over a full market cycle, approximated by the most recent 5-year period. | ✓ | | | 5-year: Grosvenor Global Recovery Fund net of fees return was 13.3% vs. 9.8% for the Global Recovery Custom Index |

Custom Benchmark Comments

The Wyoming State Actual Allocation Index is calculated using beginning month asset class weights applied to the appropriate asset class benchmark return, using the US Equity Custom Index for US equities, MSCI ACW Ex US Index (Net) for international equities, Barclays US Aggregate Bond Index for fixed income, BofA Merrill Lynch All Convertibles Index (All Qualities) for convertible bonds, NCREIF Open-End Diversified Core Equity Index (Gross) (AWA) for core real estate, NCREIF Property Index for value-added real estate, the State's actual private equity investment returns for private equity, HFN Fund of Funds Multi-Strat Index for absolute return, and BofA Merrill Lynch 90 day US T-Bill rate for cash equivalents.

Pooled Fund actual allocation indices are calculated using beginning month asset class weights applied to the appropriate asset class benchmark return, using the US Equity Custom Index for US equities, MSCI ACW Ex US Index (Net) for international equities, Barclays US Aggregate Bond Index for fixed income, BofA Merrill Lynch All Convertibles Index (All Qualities) for convertible bonds, NCREIF Open-End Diversified Core Equity Index for core real estate, NCREIF Property Index for value-added real estate, the State's actual private equity investment returns for private equity, HFN Fund of Funds Multi-Strat Index for absolute return, and the State Agency Pool Custom Index for the State Agency Pool allocation.

The US Equity Custom Index consists of the S&P 500 Index (Cap Wtd) through September 2014 and the Russell 3000 Index thereafter.

The State Street All Cap Custom Index consists of 69% Russell 3000 Index, 23% FTSE RAFI US 1000 Index and 7% MSCI USA Minimum Volatility Index (Net).

The International Equity Custom Index and the Fisher Custom Benchmark both consist of MSCI EAFE Index (Gross) through July 2010 and the MSCI ACW Ex US Index (Net) thereafter.

The Credit Custom Index consists of 20% Barclays US Credit Index, 20% BofA Merrill Lynch US High Yield Master II Constrained Index, and 60% S&P/LSTA Leveraged Loan Index.

The JP Morgan Blended Index consists of an equal-weighted allocation to the BofA Merrill Lynch 1-3 Year US Treasury Index, BofA Merrill Lynch 1-3 Year US Agencies Index, and BofA Merrill Lynch 0-3 Year Weighted Average Life Mortgage Index.

The JP Morgan Cash Custom Index is calculated monthly using beginning of the month investment weights applied to each corresponding primary benchmark return. Currently, the primary benchmark for JP Morgan Cash is the BofA ML 3 ML US T-Bill Index and for JP Morgan Extd is the JP Morgan Blended Index.

The Wyo-Star Cash Custom Index is calculated monthly using beginning of the month investment weights applied to each corresponding primary benchmark return. Currently, the primary benchmark for Wyo-Star Cash is the BofA ML 3 ML US T-Bill Index and for Wyo-Star Extd is the JP Morgan Blended Index.

The Global Recovery Custom Index consists of 50% Credit Suisse Distressed Loan Index, 20% Credit Suisse High Yield Index, and 30% ABX Index.

Performance & Holding Comments

RVK, Inc. shows performance beginning with the first full month following inception. Inception date shown for the Global Equity, Int'l Equity, and JP Morgan Cash Composites represents the first date of performance calculated by RVK, Inc.

Performance shown for Pooled Funds is calculated on a capital-weighted basis using beginning-period allocations and does not reflect net cash flows.

Performance shown for the UW Portfolio Management Program prior to 07/01/2009 includes their participation in the State Agency Pool. Performance calculated for the UW Portfolio Management Program after 02/01/2013 has not been verified by RVK as the assets have been moved to a platform in which the custodian does not provide a reconcilable return.

Where stated, allocations to fixed income include convertibles and Wyoming Investments.

Performance shown for the JP Morgan Cash Composite and the Wyo-Star Cash Composite consists of the respective operating and extended cash accounts.

RVK endorses GIPS and calculates performance for investment managers and composites using different methodologies. For additional information, please see the Glossary.

Due to portfolio turnover, buy and hold attribution may not accurately represent quarterly performance relative to the benchmark.

Alternative Investment Comments

Reporting for Private Equity performance was changed from cost basis to the latest portfolio valuation adjusted for cash flows, consistent with the supplementary alternatives report. This methodology change involved reflecting the difference between cost value and the most recent valuation, resulting in a significant positive performance impact on the total fund during 2nd quarter 2008.

Valuations for value-added real estate and private equity were changed from a one-quarter lag to as of the most recent valuation, adjusted for subsequent cash flows. This methodology change involved reflecting all cash flows occurring during 4th quarter 2011 as of January 2012, resulting in a minor positive performance impact on the total fund during 1st quarter 2012. Investment (Cost) Values are not lagged.

Performance for value-added real estate and private equity investments is calculated on an IRR basis. For further analysis, please refer to the supplementary alternatives performance report.

Cheyenne Capital Fund valuations set forth herein could be materially different once underlying investments are realized. Market conditions at the time of exit could be substantially different than at the reporting period, resulting in valuations different than those represented above.

Miscellaneous Comments

Wyoming State Treasurer's Office fiscal year ends on June 30th.

Fixed Income style peer groups have low populations, and may cause ranks to change significantly from quarter to quarter.

Per the request of the Treasurer's Office, LDIs and Other Wyoming Investments have been re-named to Wyoming Investments.

"IM" is the acronym for Investment Metrics, the provider of peer group data used in ranking investment manager and asset class performance.

Effective March 19, 2012, Barclays Capital ("BC") indices have been rebranded to "Barclays". Naming conventions have been updated to "Barclays" or "B" to reflect the change.

During the 4th quarter of 2012, WAMCO Core Plus, Neuberger Berman Core Plus, PIMCO Core Plus, PIMCO Mortgages, JP Morgan Mortgages, WAMCO Corporates, Logan Circle, and PIMCO Global/EM began the liquidation process to transition assets to the State's new fixed income asset class structure. The proceeds were used to fund State Street TIPS, C.S. McKee, JP Morgan Core, MacKay Shields, Neuberger Berman Core, PIMCO Core, and Wells Capital. During the 1st quarter of 2013, additional assets were transitioned to Neuberger Berman Credit, Seix, Investec, and Stone Harbor.

During the 4th quarter of 2014, State Street S&P 500 and Gabelli began the liquidation process to transition assets to the State's new US equity asset class structure. The proceeds were used to fund State Street All Cap, Epoch, Lazard, and RBC. During the 1st quarter of 2015, additional assets were transitioned to Arrowstreet.

Glossary

Alpha - A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. It is a measure of the portfolio's historical performance not explained by movements of the market or a portfolio's non-systematic return.

Alpha Ratio - A measure of a portfolio's non-systematic return per unit of downside risk. It is measured by dividing the alpha of a portfolio by the downside risk. The non-systematic return is a measure of a portfolio's historical performance not explained by movements of the market.

Average Quality - Bond quality ratings are reported using the investment managers' and the index providers' preferred rating agency. **Average Quality for managers unable to provide this statistic has been estimated using a credit quality distribution provided by the manager.** There are two primary rating agencies in the US. *Moody's* assigns ratings on a system that employs up to four symbols (consisting of letters and numbers) such as, Aaa, Aa2, etc., with Aaa being the highest or safest rating. *Standard & Poor's (S&P)* employs a system that uses + and - along with letters such as AAA, AA+, etc. The two rating agencies' systems are summarized below:

| <u>S&P</u> | <u>Moody's</u> | <u>Explanation</u> | <u>S&P</u> | <u>Moody's</u> | <u>Explanation</u> |
|---|----------------|------------------------------|--|----------------|---------------------------------|
| Higher Credit Quality – Investment Grade | | | Lower Credit Quality – Below Investment Grade | | |
| AAA | Aaa | Prime/Highest credit quality | BB+ | Ba1 | Speculative/Low credit quality |
| AA+ | Aa1 | High credit quality | BB | Ba2 | |
| AA | Aa2 | | BB- | Ba3 | |
| AA- | Aa3 | | B+ | B1 | Highly speculative |
| A+ | A1 | Upper-medium credit quality | B | B2 | |
| A | A2 | | B- | B3 | |
| A- | A3 | | CCC+ | Caa1 | Substantial credit/default risk |
| BBB+ | Baa1 | Lower-medium credit quality | CCC | Caa2 | Extremely speculative |
| BBB | Baa2 | | CCC- | Caa3 | |
| BBB- | Baa3 | | CC | Ca | Vulnerable to default |
| | | | C | Ca | |
| | | | D | C | In default |

Beta - A measure of the sensitivity of a portfolio to the movements in the market. It is a measure of a portfolio's non-diversifiable or systematic risk.

Buy and Hold Attribution - At the beginning of the time period under analysis, the manager and benchmark portfolios are broken down into segments (i.e., styles, sectors, countries, and regions) based on the desired type of attribution. The formula assumes zero turn-over to the manager and benchmark portfolios throughout the period and calculates the segment returns ("buy and hold returns") to arrive at performance attribution. Due to portfolio turnover, buy and hold attribution may not accurately represent quarterly performance relative to the benchmark. Country, region, sector, and style allocations are as of the date one quarter prior to the reporting date, and the returns shown are for those segments throughout the quarter reported. Due to disclosure guidelines set by each investment manager, equity characteristics shown are as of the most recent date available. The following is the methodology for segment classification:

Sector - Attribution is calculated using the Global Industry Classification Standard (GICS) which is a detailed and comprehensive structure for sector and industry analysis. Stocks are classified by their primary sector, as defined by S&P Capital IQ data.

Country/Region - Attribution is calculated using the Morgan Stanley Capital International (MSCI) region standards. Stocks are classified by their domicile country/region, as defined by S&P Capital IQ data.

Style - Stocks are classified into the following style boxes: large/mid/small vs. growth/neutral/value. Stocks are classified along large/mid/small categories at the time of the Russell index rebalancing, using the index market cap boundaries as cutoff points. Stocks are classified along growth/neutral/value categories at the time of the Russell index rebalancing, using the price/book ratio as supplied by S&P Capital IQ. Stocks in the Russell 3000 Index portfolio are sorted by price/book ratio; names with the highest price/book ratio that make up 1/3 of the total market capitalization are assigned to the growth category, names that make up the subsequent 1/3 of the total market capitalization are assigned to the neutral category, while the balance of the names are assigned to the value category.

Portfolio Characteristics and Buy and Hold Attribution reports utilize product-specific data for all mutual funds and commingled funds.

Glossary

Capital Markets Review -

Breakeven Inflation - Measures the expected inflation rate at each stated maturity by taking the difference between the real yield of the inflation-linked maturity curve and the yield of the closest nominal Treasury maturity.

Consumer Confidence - Measures domestic consumer confidence as defined by the degree of optimism on the state of the economy that consumers express through saving and spending.

Consumer Price Index (CPI) - Measures the change in the price level of consumer goods and services.

Option-Adjusted Spread - Measures the flat spread of an index or bond to the Treasury yield curve after removing the effect of any embedded options.

Purchasing Managers Index (PMI) - Measures economic activity by surveying purchasing managers on a monthly basis as to whether business conditions have improved, worsened, or stayed the same.

US Dollar Total Weighted Index - Measures the value of the US Dollar relative to a basket of other world currencies. It is calculated as the weighted geometric mean of the dollar's value versus the EUR, GBP, CAD, SEK, CHF, and JPY.

VIX - Measures the implied volatility of S&P 500 Index options by looking at the market's expectation of the S&P 500 Index volatility over the next 30 day period. Commonly referred to as the "fear index" or the "fear gauge."

Consistency - The percentage of quarters that a product achieved a rate of return higher than that of its benchmark. The higher the consistency figure, the more value a manager has contributed to the product's performance.

Convexity - A measure of the shape of the curve that describes the relationship between bond prices and bond yields.

Correlation - A statistical measure of the relationship between asset class returns. A value of 1.00 is a perfect correlation; that is, the asset classes always move in the same direction. A value of -1.00 indicates a perfect negative correlation, in which the asset classes always move in opposite directions of each other. A value of 0 indicates there is no relationship between the direction of returns of the two asset classes. Correlation calculations only consider the direction of changes relative to two variables and not the magnitude of those changes.

Coupon Rate - The percentage rate of interest paid on a bond or fixed income security; it is typically paid twice per year.

Current Yield - The annual income of a security divided by the security's current price.

Down Market Capture - Down market by definition is negative benchmark return and down market capture represents the ratio in % terms of the average portfolios return over the benchmark during the down market period. The lower the value of the down market capture the better the product's performance.

Downside Risk - A measure similar to standard deviation, but focuses only on the negative movements of the return series. It is calculated by taking the standard deviation of the negative quarterly set of returns. The higher the factor, the riskier the product.

Earnings Per Share - It is backward looking, calculated using the one year current EPS divided by the one year EPS five years ago.

Effective Duration - The weighted average duration of all the bonds in a given portfolio, weighted by their dollar values.

Excess Return vs. Market - Average of the monthly arithmetic difference between the manager's return and the benchmark return over a specified time period, shown on an annualized basis.

Excess Return vs. Risk Free - Average of the monthly arithmetic difference between the manager's return and the risk-free return (i.e., BofA ML 3 Mo US T-Bill Index unless specified otherwise) over a specified time period, shown on an annualized basis.

Excess Risk - A measure of the standard deviation of a portfolio's performance relative to the risk free return.

Expense Ratios - Morningstar is the source for mutual fund expense ratios.

Gain/Loss - The net increase or decrease in the market value of a portfolio excluding its Net Cash Flow for a given period.

Indices - All indices and related information are considered intellectual property and are licensed by each index provider. The indices may not be copied, used or distributed without the index provider's prior written approval. Index providers make no warranties and bear no liability with respect to the indices, any related data, their quality, accuracy, suitability and/or completeness.

Information Ratio - Measured by dividing the active rate of return by the tracking error. The higher the information ratio, the more value-added contribution by the manager.

Glossary

Liability Driven Investing (LDI) - A method to optimally structure asset investments relative to liabilities. The change in liabilities is estimated by the Ryan Labs Generic PPA Index of appropriate duration for that Plan. This benchmark is based on generic data and is therefore an approximation. RVK is not an actuarial firm, and does not have actuarial expertise.

Estimated Funded Status - The estimated ratio of a Plan's assets relative to its future liabilities. This is calculated by dividing the Plan's asset market value by the estimated present value of its liabilities. The higher the estimated funded status, the better the Plan's ability to cover its projected benefit obligations. An estimated funded status of 100% indicates a Plan that is fully funded.

Estimated PV of Liabilities - An estimate of a Plan's future liabilities in present value terms. The beginning of the period liability is provided by the Plan's actuary. The period-end present value liability estimate provided in this report is derived by applying the estimated percentage change generated using the Ryan Labs Generic PPA Index with duration similar to that reported on the most recent actuarial valuation report.

Duration of Liabilities - The sensitivity of the value of a Plan's liabilities to changes in interest rates, as calculated by the Plan's actuary.

Duration of Assets - The dollar-weighted average duration of all the individual Plan assets.

Estimated Plan Hedge Ratio - The estimate of how well a Plan's investment portfolio is hedged against changes in interest rates - a primary driver of funded status movements. This is calculated by dividing the dollar-weighted values of both the Plan asset duration by the liability duration and multiplying by the estimated funded status. An estimated plan hedge ratio of zero indicates that the Plan's liabilities have not been hedged, whereas a value of one indicates fully hedged.

Modified Duration - The approximate percentage change in a bond's price for a 100 basis point change in yield.

Net Cash Flow - The sum, in dollars, of a portfolio's contributions and withdrawals. This includes all management fees and expenses only when performance shown is gross of fees.

Peer Groups -

Plan Sponsor Peer Groups - RVK utilizes the Mellon Analytical Solutions Trust Universe along with the Investment Metrics Plan Sponsor Universe. The combined Mellon Analytical Solutions Trust Universe and Investment Metrics Plan Sponsor Universe is used for comparison of total fund composite results and utilizes actual client returns compiled from consultant and custodial data. The Plan Sponsor Peer Group database includes performance and other quantitative data for over 2,100 plans which include corporate, endowment, foundation, public, and Taft Hartley plans. Plan Sponsor Peer Groups are gross of fees.

Institutional Peer Groups (Separate Account and Commingled Fund) - RVK utilizes the Investment Metrics Separate Account and Commingled Fund Manager Peer Groups for peer comparison and rankings. The Separate Account and Commingled Fund Peer Group database includes performance and other quantitative data for over 1,000 investment management firms, 6,400 investment products, across 100 standard peer groups. Separate Account and Commingled Fund Peer Groups are gross of fees.

Mutual Fund (MF) Peer Groups - RVK utilizes the Lipper Mutual Fund Manager Peer Groups for peer comparison and rankings. The Lipper Manager Peer Group database includes performance and other quantitative data for over 700 investment management firms and 24,500 investment products, across more than 140 standard peer groups. Mutual Fund Peer Groups are net of fees.

Percentile Rankings - Percentile rank compares an individual fund's performance with those of other funds within a defined peer group of managers possessing a similar investment style. Percentile rank identifies the percentage of a fund's peer group that has a higher return (or other comparative measurement) than the fund being ranked. Conversely, 100 minus the individual fund's ranking will identify the percentage of funds within the peer group that have a lower return than the fund being ranked.

1 - Highest Statistical Value

100 - Lowest Statistical Value

Example: American Funds AMCP;R-4 (RAFEX) is ranked in the 4th percentile within the IM US Equity Large-Cap Growth Funds (MF) Peer Group for the Sharpe Ratio. Within the IM US Equity Large-Cap Growth Funds peer group, 4% of the other funds performed better than American Funds AMCP;R-4 (RAFEX), while 96% of the funds performed worse.

Performance Methodology - RVK endorses the Global Investment Performance Standards (GIPS) and calculates performance for investment managers and composites using different methodologies. Investment manager performance is calculated by revaluing the portfolio on the date of all large external cash flows while composite performance is calculated using the Modified Dietz calculation methodology. According to the CFA Institute, "Only investment management firms that actually manage assets can claim compliance with the Standards. Plan Sponsors and consultants cannot make a claim of compliance unless they actually manage assets for which they are making a claim of compliance. They can claim to endorse the Standards and/or require that their investment managers comply with the Standards."

Investment Managers - Performance is calculated for interim periods between all large external cash flows for a given month and geometrically linked to calculate period returns. An external cash flow is defined as cash, securities, or assets that enter or exit a portfolio. RVK defines a "large cash flow" as a net aggregate cash flow of $\geq 10\%$ of the beginning-period portfolio market value or any cash flow that causes RVK calculated performance to deviate from manager/custodian reported performance in excess of 5 basis points for a given month.

Glossary

Composites - The Modified Dietz methodology is utilized to calculate asset class, sub-asset class, and total fund composite performance. The Modified Dietz method calculates a time-weighted total rate of return that considers the timing of external cash flows; however, it does not utilize interim period performance to mitigate the impact of significant cash in- and outflows to the composite.

RVK calculates performance beginning with the first full month following inception. Since inception performance may vary from manager reported performance due to RVK using the first full month of returns as the inception date. Performance for both managers and composites is annualized for periods greater than one year.

Portfolio Characteristics - Due to disclosure guidelines set by each investment manager, portfolio characteristics shown are as of the most recent date available.

Private Equity Quartile Ranks – Private Equity quartile ranks are generated using vintage year peer group data provided by Thomson Reuters, and are based on each fund's annualized, since inception internal rate of return (IRR). Three Private Equity peer groups are available via Thomson Reuters: Buyout, Venture, and All Private Equity. Ranks are available quarterly, at a one-quarter lag.

Return - Compounded rate of return for the period.

%Return - The time-weighted rate of return of a portfolio for a given period.

R-Squared - The percentage of a portfolio's performance explained by the behavior of the appropriate benchmark. High R-Squared means a higher correlation of the portfolio's performance to the appropriate benchmark.

Risk Free Benchmark - BofA ML 3 Mo US T-Bill Index unless specified otherwise.

RVK Liquidity Rating - A qualitative method for determining the relative amount of liquidity in a portfolio. The characteristics considered when determining relative liquidity include trading volume, gates for redemption, leverage, nature of transactions, and pricing mechanisms. The RVK Liquidity Rating is calculated using beginning of month investment weights applied to each corresponding asset class liquidity rating.

| <u>Asset Class</u> | <u>RVK Liquidity Rating</u> | <u>Asset Class</u> | <u>RVK Liquidity Rating</u> |
|-------------------------------------|-----------------------------|--------------------------------------|-----------------------------|
| <u>Liquid Investments</u> | | <u>Less Liquid Investments</u> | |
| T-Bills and Treasuries | 100 | Fixed Income Plus Sector | 50 |
| Cash Equivalents | 98 | Bank Loans | 50 |
| TIPS | 95 | Stable Value (Plan Sponsor Directed) | 50 |
| US Large Cap Equity | 95 | Absolute Return Strategies | 35 |
| Diversified Real Return | 93 | <u>Not Liquid Investments</u> | |
| Stable Value (Participant Directed) | 91 | Core Real Estate | 25 |
| Non-US Large Cap Equity | 90 | Core Plus Real Estate | 15 |
| Global Tactical Asset Allocation | 88 | Plus Only Real Estate | 5 |
| US Small Cap Equity | 85 | Private Equity Funds of Funds | 5 |
| REITS | 85 | | |
| Non-US Small Cap Equity | 85 | | |
| Emerging Markets Equity | 85 | | |
| Core Fixed Income | 85 | | |
| Core Plus Fixed Income | 80 | | |

Sharpe Ratio - Represents the excess rate of return over the risk-free return (i.e., BofA ML 3 Mo US T-Bill Index unless specified otherwise), divided by the standard deviation of the excess return. The result is the absolute rate of return per unit of risk. The higher the value, the better the product's historical risk-adjusted performance.

Simple Alpha - The difference between the manager's return and the benchmark's return.

Spread Duration - A measure of the price sensitivity of a bond to a 100 basis-point movement of the bond's spread relative to Treasuries.

Glossary

Standard Deviation - A statistical measure of the range of a portfolio's performance. The variability of a return around its average return over a specified time period.

Time Period Abbreviations - **QTD** - Quarter-to-Date. **CYTD** - Calendar Year-to-Date. **FYTD** - Fiscal Year-to-Date. **YOY** - Year Over Year.

Thematic Classification - Represents dedicated manager allocations; as such, thematic allocations are approximations. RVK categorizes the following asset classes as Alpha, Capital Appreciation, Capital Preservation, and Inflation:

| <u>Alpha</u> | <u>Capital Appreciation</u> | <u>Capital Preservation</u> | <u>Inflation</u> |
|----------------------------|------------------------------|--------------------------------------|------------------|
| Absolute Return Strategies | Public Equity | Core Fixed Income | TIPS |
| Currency Overlay | Private Equity | CMBS Fixed Income | Bank Loans |
| | Preferred Securities | Asset Backed Fixed Income | Core Real Estate |
| | High Yield | Domestic Core Plus Fixed Income | Real Return |
| | Convertible Fixed Income | Mortgage Backed Fixed Income | Inflation Hedges |
| | TALF Funds | International Developed Fixed Income | REITS |
| | Distressed Debt | Cash Equivalents | Commodities |
| | Emerging Market Fixed Income | Stable Value | |
| | Value Added Real Estate | | |
| | Opportunistic Real Estate | | |

Total Fund Attribution - A method for identifying the sources of a total fund's over- or underperformance relative to its benchmark. The calculation identifies the contributions of positive or negative total fund excess return caused by allocation differences relative to the total fund's custom benchmark, and performance differences of the investment managers relative to the benchmark components that represent them.

Total Fund Performance -

Total Fund - The percentage return of the total fund for the specified time period.

Total Fund Benchmark - The percentage return of the total fund benchmark for the specified time period; calculated using the target asset allocation and the corresponding benchmark returns.

Total Value Added - The percentage of over- or underperformance of the total fund as compared to the total fund benchmark.

Total Value Added -

Asset Allocation - Shows how the variance of the total fund's actual allocation from its target allocation added to or subtracted from fund performance.

Manager Value Added - The portion of the total value added attributable to the outperformance or underperformance of the fund's investment managers, relative to the individual benchmarks that represent them in the total fund benchmark.

Market Timing/Other - The contribution of other residual factors, including estimation error and transaction timing.

Total Fund Beta - Total Fund Beta is calculated using the S&P 500 as the benchmark. It represents a measure of the sensitivity of the total fund to movements in the S&P 500 and is a measure of the Total Fund's non-diversifiable or systematic risk.

Tracking Error - A measure of the standard deviation of a portfolio's performance relative to the performance of an appropriate market benchmark.

Treynor Ratio - Similar to Sharpe ratio, but focuses on beta rather than excess risk (standard deviation). Treynor ratio represents the excess rate of return over the risk-free rate (i.e., BofA ML 3 Mo US T-Bill Index unless specified otherwise) divided by the beta. The result is the absolute rate of return per unit of risk. The higher the value, the better historical risk-adjusted performance.

Unit Value - The dollar value of a portfolio, assuming an initial nominal investment of \$100, growing at the compounded rate of %Return for a given period.

Up Market Capture - Up market by definition is positive benchmark return and up market capture represents the ratio in % terms of the average portfolios return over the benchmark during the up market period. The higher the value of the up market capture the better the product's performance.

Yield to Maturity - The rate of return achieved on a bond or other fixed income security assuming the security is bought and held to maturity and that the coupon interest paid over the life of the bond will be reinvested at the same rate of return.

Yield to Worst - The bond yield calculated by using the worst possible yield taking into consideration all call, put, and optional sink dates.
